Vencobelt

Egg Belt

The Vencobelt gently transports table and hatching eggs from different nest rows or barns to a central on-farm location.

The belt is 40 cm (16 inches) wide, allowing for a capacity of up to 26,000 eggs per hour. The design and smooth connections of the belt allow a slope of up to 28 degrees and small radius corners of up to 180 degrees. With only one drive chain, the belt is flexible and can allow for a 90° corner in one square meter (approx. 39 inches).

Key Features

- Durable plastic egg carriers
- One-chain system
- Maximum slope of up to 28 degrees
- Compact corners up to 180 degrees
- Gentle egg transfer
- Up to 100 meters (328 feet) with only 1 motor
- Connects to several nest or system rows
- Oil lubrication system permits in-house maintenance
